To guide you to better food choices for our planet, we have teamed up with Klimato to present climate labels on our menus. Klimato assesses the emissions related to each stage of the food product lifecycle to calculate the carbon footprint of the dishes served during the event. The Klimato label indicates whether a dish has low, medium or high carbon footprint.

Food allergen, intolerance and sensitivity information is compiled using data obtained from our approved suppliers. As with every catering establishment, there is always a potential for cross-contamination to occur. While we endeavour to prevent this as far as possible, the nature of an allergen means we cannot fully guarantee that cross-contamination may not have occurred. If you have any concerns, please speak to a member of staff. This menu is subject to change.
