With our mission to achieve Climate Net Zero, we are making conscious changes to the ways we source and serve food. Our culinary team have teamed up with Foodsteps to make climate-friendly changes to the menu. The carbon labelling tool assesses the greenhouse gas emissions released from farm to waste to calculate the carbon footprint of the dishes served today. Food items are rated based on their carbon intensity, from A ('Very Low' impact) to E ('Very High' impact).

Allergen information is compiled using data obtained from our approved suppliers. As with every catering establishment there is always a potential for cross-contamination to occur. While we endeavour to prevent this as far as possible, the nature of an allergen means we cannot fully guarantee that cross-contamination may not have occurred. If you have any concerns, please speak to a member of staff. Please note, this menu is subject to change.
